

Accelerating Energy Transformation @ SIEW 2019

Join the discussions at the [Singapore International Energy Week](#) (SIEW) 2019, as global energy thought leaders deliberate on the theme of Accelerating Energy Transformation at the [SIEW Opening Keynote Address](#) and [Singapore Energy Summit](#). The energy landscape continues to experience major shifts. Global energy demand is expanding, and this is especially pronounced in Asia. The growth in energy demand will also be driven by electrification of transportation, industries and buildings. This demand has been supported by increased supply of oil and gas, lowered cost of renewables and technological advancements in energy storage. However, there remain concerns over meeting climate change commitments, even as renewable energy investments hit record highs.

Against this backdrop, SIEW will provide a platform for global energy stakeholders to deliberate on and accelerate the transformation towards a more sustainable energy future.
